CSI 05520  
September 2008

modular warning line system  
perfect for temporary needs  
and quick setups

## Warning Lines

KEE MARK is a sturdy, durable, freestanding and cost effective portable warning line, for indoors and out. The simple modular design incorporates durable galvanized KEE KLAMP components and galvanized uprights that stay in place with a hidden set screw. The heavy-duty nylon mesh flags are available in safety orange or safety yellow. The stainless steel wire cable is vinyl coated for long term outdoor use in safety yellow for greater visibility. The cables are connected to the uprights with stainless steel shackles which makes adjusting the layout very easy. The removable bases are made of solid heavy duty recycled rubber. KEE MARK is a warning line solution that is engineered to stand its ground, job site after job site. Meets OSHA standard for warning lines.

Kit	Description
KMWL20	Kee Mark Warning Line Base 20' Long Kit
KMWL20E	Kee Mark Warning Lane Extension 20' Long Kit

If the application requires just a 20' run, KEE MARK base kit can be used by itself. To cover bigger areas, add as many extension kits to the base kit as needed.

## Benefits

- Quick set-up, modular, free-standing
- Cost effective systems for interior or exterior demarcation
- Durable galvanized components and uprights
- Heavy-duty rubber bases for ease of installation
- Vinyl coated stainless steel cable for long lasting protection
